SUMMARY

Full-Stack MERN Developer with 3+ years of experience in frontend development and 2+ years building full-stack web applications using MongoDB, Express.js, React.js, and Node.js. Experienced in designing scalable RESTful APIs, building responsive user interfaces, and integrating frontend and backend systems. Proficient in JavaScript (ES6+), TypeScript, Next.js, Redux, and modern UI frameworks such as Tailwind CSS and Material UI. Skilled in database design, authentication systems, and performance optimization. Passionate about writing clean, maintainable code and building scalable web applications that deliver excellent user experiences.

WORK HISTORY

Full Stack Developer (MERN) | Freelance – Upwork, Mostaqi

July 2024 – Present

- Developed full-stack web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Built responsive and reusable frontend components using React.js and Next.js.
- Designed and implemented RESTful APIs using Node.js and Express.js.
- Implemented authentication and authorization using JWT and secure session handling.
- Integrated third-party APIs and payment systems such as Stripe.
- Designed and optimized MongoDB database schemas and queries.
- Improved application performance, SEO, and accessibility for production-ready web applications.

Frontend Developer | Falsafa Raqamia

2024 - 2025

- Developed and maintained responsive web applications using React.js, ensuring high performance.
- Built reusable and scalable UI components to improve development efficiency and maintain consistent design across the platform.
- Integrated RESTful APIs to handle dynamic data such as product listings, user authentication, and order information.
- Implemented state management and form handling to manage complex user interactions and improve application reliability.

PROJECTS

Full-Stack E-Commerce Platform (MERN, Next.js, Cloudinary, Stripe)

- Designed and developed a full-stack e-commerce platform using the MERN stack with Next.js for server-side rendering, focusing on scalability, performance, and maintainable architecture.

Key Contributions:

- Architected a modular React component system to build reusable UI components across the product catalog, cart, authentication, and checkout workflows.
- Built RESTful APIs using Node.js and Express.js to handle product management, cart operations, user authentication, and order processing.
- Designed MongoDB schemas for users, products, carts, and orders with optimized queries to ensure efficient data retrieval and scalability.
- Integrated Stripe payment gateway to support secure checkout, multi-currency payments, and order transaction validation.
- Implemented authentication and authorization using JWT, protecting user accounts, order history, and checkout routes.

- Utilized Next.js server-side rendering (SSR) and static generation to improve performance, SEO, and initial page load times.
- Styled responsive and mobile-first user interfaces using Tailwind CSS, ensuring a consistent and modern user experience across devices.
- Implemented Cloudinary integration in the Node.js backend for secure image uploads, cloud storage, and automatic media optimization.
- Tech Stack: MERN Stack, Next.js, Stripe API, Strapi CMS, Tailwind CSS.

Admin Dashboard Application (React.js, Firebase, MUI)

- Developed a responsive admin dashboard using React.js and Material UI for managing products, users, and orders.
- Integrated Firebase for authentication and real-time database functionality.
- Implemented analytics dashboards and charts to visualize application data.
- Built task management and event scheduling features using calendar components.
- Designed a clean and responsive UI focused on usability and modern dashboard design.
